AWARDED PROJECT TITLE

Street Reconstruction - Saginaw Avenue from the Alley South of 139th Street to 141st Street

AWARDED PROJECT DESCRIPTION

Capital Improvements: Reconstruction of Saginaw Avenue from the alley south of 139th Street to 141st Street. Pavement reconstruction will consist of full -depth patching where needed, full width grinding of the existing pavement and subsequent hot mix asphalt surface overlay. Reconstruction or adjustment of drainage structures, intermittent curb and gutter removal and replacement, restoration of sidewalks, driveways and parkways will also be performed where needed. Total length of street to be reconstructed is 1,170 feet.

Alley Reconstruction: North/South alley between Desplaines and Ferdinand from Adams to Jackson

AWARDED PROJECT DESCRIPTION

Capital Improvements: Street Reconstruction: North/South alley between Desplaines and Ferdinand from Adams to Jackson. This project will consist of the complete removal and replacement of a deteriorated alley. Earth excavation and replacement of unsuitable material under the planned pavement will be performed. The pavement condition in the alley is very poor and causing drainage problems. Drainage structures will be adjusted to provide improved flow of storm water. Driveway aprons, curb and gutter, and sidewalk will be adjusted to accommodate the new alley. Necessary traffic control and protection will be provided for the work zone. (600 I.f.)

AWARDED PROJECT TITLE

Street Reconstruction: Wallace and Normal from 142nd St. to 144th St. and Wabash Ave. from 138th St. to 140th St.

AWARDED PROJECT DESCRIPTION

Capital Improvements: The proposed improvement consists of the full-width 2-1/4" depth resurfacing of each street. The construction sequence of operations will consist of initially grinding and removing of 2-1/4" of the asphalt surface. Repairs will be made to drainage structures and the aggregate base as needed through pavement patching operations. Next, distressed concrete curb and gutter will be removed and replaced as needed. The existing road will be repaved with one 3/4" life or hot-mix asphalt leveling binder, pavement fabric will be installed on top of the leveling binder to protect against reflective cracking and extend the pavement's life, and finally the final hot mix asphalt surface course will be installed.
